TELECOMMUNICATIONS REGULATION CIRCULAR

REVISED MARITIME MOBILE RADIOTELEGRAPH BANDS

EFFECTIVE DATE: JANUARY 2, 1977
(REPLACES TRC - 12 OF MARCH 30, 1976)

TELECOMMUNICATION REGULATORY SERVICE
OPERATIONS BRANCH

Telecommunications Regulation Circulars are issued for the guidance of those engaged in telecommunications in Canada. The information contained in these circulars is subject to change at any time and it is therefore suggested that interested persons consult the nearest Department of Communications office to ascertain whether or not this circular is current.

IMPLEMENTATION IN CANADA OF REVISEDMARITIME MOBILE RADIOTELEGRAPH BANDS

1. A World Administrative Radio Conference of the International Telecommunications Union held in Geneva from April 22 to June 7, 1974 completely rearranged the subdivision of the frequency bands between 4000 and 27,500 kHz allocated exclusively to the Maritime Mobile Service. Insofar as these changes affect Canadian users of Maritime Mobile radiotelegraph communications the following information may be used as a guide.
2. The Conference abolished the distinction between high and low traffic ships; reduced the bands allocated to A-1 Morse radiotelegraphy and correspondingly widened those allocated to radiotelephony and narrow-band direct-printing radiotelegraphy. It also reduced the number of A-1 Morse calling frequencies which any coast station would be required to watch and substantially modified the present calling procedure.
3. The following table gives a comparison between the old and new ship radiotelegraph bands, and the effective dates of the changes.

TABLE OF FREQUENCIES ASSIGNABLE TO SHIP RADIOTELEGRAPH STATIONS USING MANUAL OR AUTOMATIC
 A1 MORSE IN THE EXCLUSIVE MARITIME MOBILE BANDS BETWEEN 4 AND 25 MHz.
